| LongLine continuous roll system

KEW Plus TarsaCare

Mattress system with pliant tarsal zone

| **THICKNESS**
ca. 6 cm / ca. 7 cm

| **3-LAYER COMPOSITION**

| **COMFORT**

| **3-layer composition – proven since 2004**

- › ideal and permanent softness for every load condition
- › gentle on carpal joints
- › integrated soft slope: promotes drying off of the surface
- › chamfer: gentle on animal joints, no stumbling edge
- › sealing lips: surround the foam inlay and the lower mat, the foam is protected

| **Specially designed TarsaCare tarsal zone in the rear third of the mat**

- › sensitive ankle joints are gently positioned
- › better air circulation keeps the skin drier
- › even small amounts of bedding are held in place – supports the organic layer structure
- › improved sure-footedness, especially when getting up and when leaving the cubicle

| **Longer lying length of 1.92 m: more freedom when lying, lying down and standing up**

- › reduces oblique lying and improves lying positions
- › therefore significantly more tails in the cubicle than with shorter lying lengths
- › cows and lying areas are noticeably cleaner
- › in most cases, there is no need for a brisket board

sealing lips on lower side

Single mat: suitable for cantilever dividers and mushroom dividers, **LongLine continuous roll system:** suitable for cantilever dividers only
